

ABRAHAM NANA KOFI KARIKARI

Python & AI Engineer | AI Automation | Backend Development | IT Infrastructure | Broadcast Technology

Ghana • abkarikari23.tech • github.com/ABKarikari23 • linkedin.com/in/abkarikari23 • WhatsApp

PROFESSIONAL SUMMARY

Python and AI engineer with a background in broadcast engineering and IT infrastructure. Builds AI agents, automation tools, backend services and practical business software using Python. Experienced in live broadcast operations, transmission monitoring, technical troubleshooting, IT systems support and media technology. Focused on reliable, testable and maintainable technology solutions.

CORE EXPERTISE

AI & Automation	AI agents, LLM applications, RAG, multi-agent orchestration, workflow automation, testing & evaluation
Python & Software	Python, Flask, REST APIs, HTML/CSS, JavaScript, Git, GitHub, backend development
Data & AI	NumPy, Pandas, Matplotlib, machine learning foundations, AI application development
IT & Infrastructure	Systems support, networking, servers, NAS/storage, troubleshooting, technical documentation
Broadcast Technology	MCR operations, transmission monitoring, playout, encoders, satellite feeds, streaming
Professional	Technical writing, problem solving, documentation, reliability-focused operations

PROFESSIONAL EXPERIENCE

Broadcast Technician / Master Control Room (MCR) Technician

Ignite Media Group (IMG), Ghana • Current / Recent Experience

- Operate and monitor live television and radio transmission systems and respond to technical issues during live programming.
- Monitor broadcast signals and troubleshoot transmission faults across studio and Master Control Room environments.
- Support playout systems, encoders, streaming platforms, satellite feeds and related broadcast equipment.
- Assist with setup, teardown, technical checks and maintenance of broadcast systems; maintain technical logs and duty reports.
- Support investigations into infrastructure issues including power, network/storage and broadcast-system failures.

IT / Systems Support Experience

Rebootech Ghana Ltd & CBN Ghana • Previous Experience

- Provided IT and systems support, troubleshooting technical issues and assisting with reliable operation of computing and enterprise technology environments.
- Applied networking, server and systems knowledge to diagnose issues, support users and maintain technical operations.

SELECTED PROJECTS

AI Agents with Python 2026 — Open-source technical series and codebase covering AI agents, tools, memory, RAG, multi-agent systems, automation, security and production-oriented workflows. Parts 01–08 published.

Smartphone BNPL Platform — Business/fintech platform concept with cross-platform mobile application and Python backend for device financing, customer accounts and payment tracking.

Car Repair Shop Platform — Business web platform using a Python backend and browser front end to manage customers, vehicles, bookings and repair jobs.

EDUCATION & CERTIFICATIONS

- Bachelor of Science (BSc), Information Technology — Kwame Nkrumah University of Science and Technology (KNUST)
- CompTIA A+
- CompTIA Network+
- CompTIA Server+
- Software Engineering & AI Technologies training — ALX Africa / IPMC College of Technology

TECHNICAL WRITING & PROFESSIONAL BRAND

Publishes practical technical content through abkarikari23.tech, covering Python, AI, software engineering, IT infrastructure, cybersecurity and broadcast technology. The AI Agents with Python 2026 series combines technical writing with working code and experiments.

TARGET SERVICES

AI & business automation • Python backend development • AI agent applications • Business software development • Technical consulting • IT infrastructure & broadcast technology support

Available for freelance AI/automation projects, software development opportunities, technical consulting and remote roles.
